

Agenda

- Greetings
- Review of your design from CPRE/EE/SE 491
- Discussion of any changes or improvements to the design
- Discussion of the objectives and requirements for CPRE/EE/SE 492

(same as 491?)

- Discussion of the schedule and milestones for the project
- Review your team process and discuss any changes or improvements
- Weekly/biweekly meeting time (monday 9-10:30 or 12-2:30? virtual?)
- Q&A session

Notes

- Meeting weekly was good, up to us, it's our exploration of
- Our design is good, can continue to further development
- Keep on the requirements
- May not need weekly meeting, can default with one a week to start with
- Monday 10-10:30 works!! First is February 5th
- Once we have an app, look at bandwidth info, update **hardware**/software requirements as needed

Summary

In this meeting our group, sd-may24-03 (An Exploration of Turing Pi Based Edge Cloud with Docker/Kubernetes). Everybody was present for the meeting, and we have our schedules blocked out via when2meet in case we need to meet more frequently. We discussed a weekly meeting schedule, last semester we met once a week. This semester we plan to start with weekly meetings, and depending on how the implementation of our project is going, we may switch to bi-weekly meetings. Meetings will Monday from 10:00-10:30 with our project advisor.
